## HIGHLIGHTS

- Iowa is home to approximately 6,040 manufacturing firms.
- Manufacturing contributed \$31.2 billion to Iowa's economy in 2014, representing 18.3 percent of the state's total gross domestic product (GDP).
- Iowa ranks eighth among all states in its percentage of GDP from manufacturing.
- The manufacturing sector's 224,382 jobs accounted for 11.0 percent of Iowa's total employment in 2014.
- More than half (52.8 percent) of Iowa's manufacturing jobs are located in its non-metropolitan counties.
- Earnings from manufacturing jobs account for 13.0 percent of total earnings in Iowa's metropolitan areas and 23.3 percent of total earnings in non-metropolitan regions.
- The average manufacturing job in Iowa paid \$54,420 in wages and salaries in 2014.
- Iowa exported \$11.24 billion worth of manufactured goods to other countries in 2015.

## NUMBER OF FIRMS

Iowa is home to approximately 6,040 manufacturing firms operating from 6,530 physical establishments throughout the state.

- A large fraction of Iowa’s manufacturing firms are small proprietorships or partnerships with no paid employees other than the principals. Known as “nonemployer firms,” these establishments comprise 49.7 percent of Iowa’s manufacturing firms.
- 45.4 percent of Iowa’s manufacturing firms are owned by small or medium-sized enterprises (SMEs) with fewer than 500 paid employees.
- Large manufacturing enterprises, with 500 or more employees, account for 4.9 percent of Iowa’s manufacturing firms.

## GROSS DOMESTIC PRODUCT

Gross domestic product (GDP) measures the contributions of labor and capital to the market value of goods and services produced in a state. The total GDP for Iowa’s industries in 2014 was \$170.6 billion.

The manufacturing sector contributed \$31.2 billion to Iowa’s economy in 2014, representing 18.3 percent of the state’s total GDP. Iowa ranks eighth among all states in the percentage of GDP derived from the manufacturing sector.

When measured by GDP size, manufacturing ranks second among Iowa’s major economic sectors. Manufacturing ranks fifth in GDP size among major economic sectors nationally.

**PERCENTAGE OF IOWA GDP BY MAJOR SECTOR**

Source: U.S. Bureau of Economic Analysis

Note: Agriculture and natural resources industries include production agriculture, agricultural services, forestry, fishing, hunting, and mining. Activities such as grain processing, ethanol production, meat slaughtering and processing, agricultural chemical and fertilizer production, and agricultural equipment manufacturing are classified within the manufacturing sector, per national industrial accounting standards. The financial activities sector includes finance, insurance, and real estate industries.

**EMPLOYMENT**

Iowa's manufacturing sector had 224,382 jobs in 2014, accounting for 11.0 percent of the state's total employment. In the United States, manufacturing accounted for 7.0 percent of total employment.

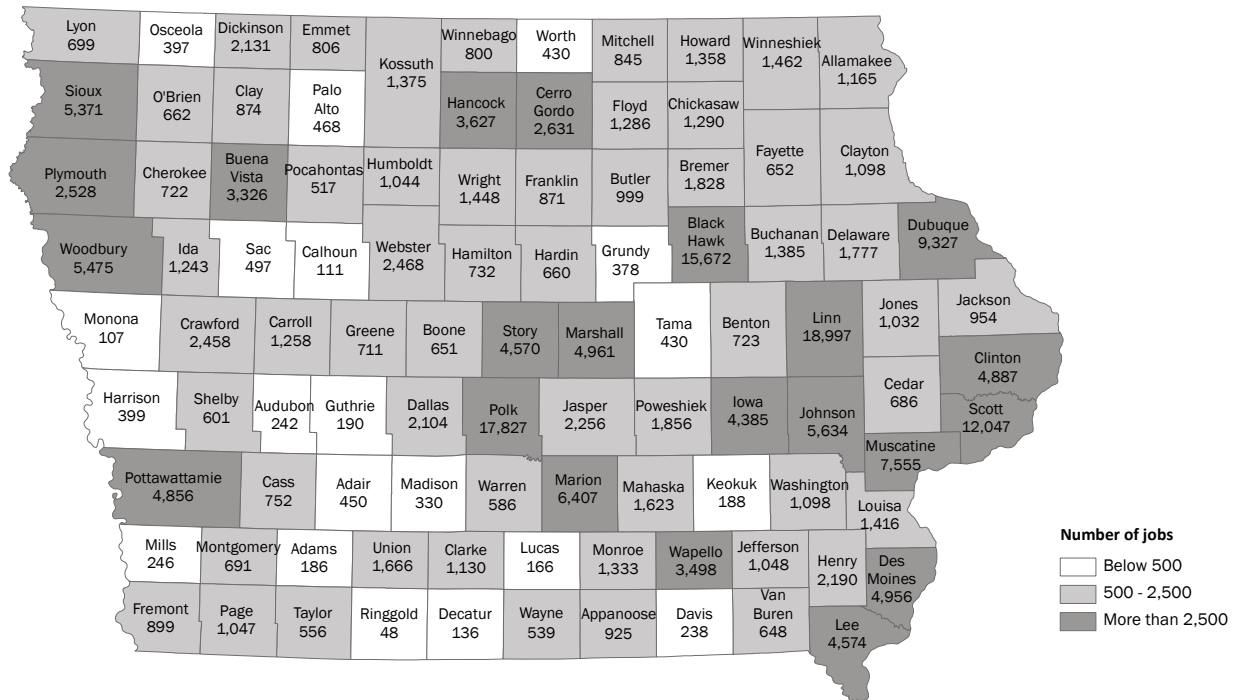

Measured by employment size, manufacturing ranks fourth among Iowa's major economic sectors. In the United States, manufacturing ranks seventh among major sectors.

More than half (52.8 percent) of Iowa's manufacturing jobs are located in non-metropolitan areas. By county, manufacturing employment was highest in Linn (18,997 jobs), followed by Polk (17,827 jobs).

Note: These employment statistics count the number of full-time and part-time jobs, as opposed to the number of employed persons.

**IOWA'S DIVERSE MANUFACTURING SECTOR**

**DURABLE AND NONDURABLE GOODS**

Industries within the manufacturing sector are frequently grouped into two broad categories: durable goods and nondurable goods. *Durable* goods are tangible products that can be stored or inventoried and that have an average life of at least three years. *Nondurable* goods have an average life of less than three years.

Iowa's durable goods industries account for a higher fraction of jobs and GDP than nondurable goods industries. Durable goods production accounts for 55.1 percent of Iowa's manufacturing GDP and 60.3 percent of its manufacturing jobs. Nationally, durable goods production accounts for 54.3 percent of manufacturing GDP and 62.6 percent of manufacturing jobs.

**SPECIALIZATION BY INDUSTRY**

Areas of relative industrial specialization within the manufacturing sector may be identified using "location quotients," which divide a state's percentage of employment in a given industry by that same industry's percentage of U.S. employment. A location quotient greater than one indicates specialization and suggests the state has a relative competitive advantage in that industry. Iowa demonstrates relative specialization in the following manufacturing industries: machinery, food and beverages, wood products, primary metals, and furniture and related products.

**DURABLE GOODS EMPLOYMENT**

**AVERAGE MANUFACTURING EARNINGS PER JOB**

- Iowa’s manufacturing workers earned an average of \$54,420 in wages and salaries in 2014. Workers across all sectors of Iowa’s economy earned an average of \$42,530 in wages and salaries per job.
- Average earnings per job in Iowa’s manufacturing sector were 86.4 percent of the U.S. average for manufacturing jobs. Iowa’s all-sector average earnings per job were 82.8 percent of the U.S. average.
- Manufacturing ranked second among Iowa’s major sectors in average wage and salary earnings per job.
- By detailed manufacturing industry, average earnings were highest in Computers and electronics manufacturing, at \$85,011 per job.
- Manufacturing wages vary across the state, with higher levels typically found in and near metropolitan areas and larger cities. In 2014, the top three counties by average manufacturing wages and salaries were Linn (\$82,702), Black Hawk (\$64,604), and Fremont (\$62,874).
- Manufacturing jobs in 17 of Iowa’s 99 counties paid more than the statewide average of \$54,420 in wages and salaries per job in 2014. Manufacturing pay levels were below 80 percent of the statewide average in 37 counties.

**EXPORTS FROM IOWA**

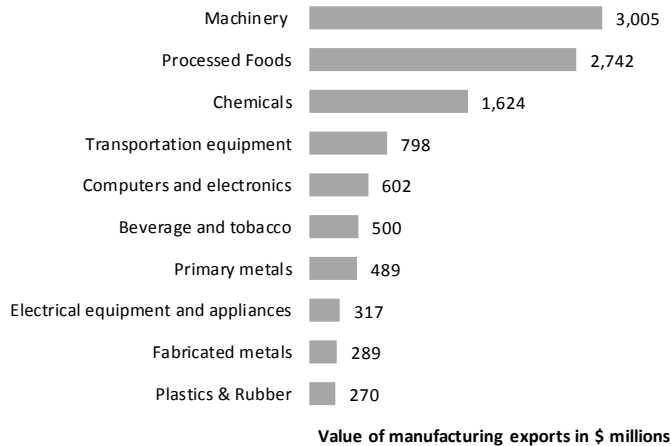

**BY TYPE OF GOOD**

In 2015, the state of Iowa was the transportation origin for \$13.1 billion worth of merchandise exports including agricultural commodities, raw materials, and manufactured goods. Manufactured goods accounted for 86 percent of the state's total exports.

With \$11.24 billion worth of manufactured exports in 2015, Iowa ranked 28th among all states on this measure (see Export Data Notes for information about export measurement).

Iowa's single largest manufacturing export industry was Machinery manufacturing, which accounted for 26.7 percent of the state's total manufacturing exports.

**IOWA'S TOP 10 MANUFACTURING EXPORT INDUSTRIES**

**BY DESTINATION**

The greatest share (45.8 percent) of Iowa's manufactured exports are shipped to its trading partners in North America. Asia and Europe follow as the top importers of manufactured goods from Iowa.

Canada was the top destination country for Iowa's manufactured exports in 2015, followed by Mexico and China.

**DESTINATIONS OF IOWA MANUFACTURING EXPORTS**

**EXPORT DATA NOTES**

**Origin of Movement**

It is important to note that Iowa's export totals do not reflect the value of agricultural and other goods that were originally produced in Iowa but ultimately exported from other states. The trade statistics on this page are based on origin of movement (OM) data from the U.S. Department of Commerce. The OM data credit exports to the state where the goods began their final journey to the point of exit from the United States, as specified on official U.S. export declarations filed by shippers. The place from which merchandise began its export journey is not necessarily the place where the merchandise was produced. In many cases, the OM is the location of a distributor, warehouse, or cargo processing facility. Consequently, OM cannot be used to reliably describe the production origin of U.S. exports.

### MANUFACTURING SECTOR PERCENTAGE SHARES OF GDP AND EMPLOYMENT

Manufacturing has accounted for a declining share of U.S. GDP in recent decades, with the manufacturing sector’s contribution falling from 24.4 percent to 12.3 percent between 1970 and 2010. In 2014, the national percentage was 12.1 percent.

In Iowa, the share of total GDP contributed by manufacturing dropped from 22.1 percent in 1970 to 18.7 percent in 2010. The manufacturing sector’s share fell to 18.3 percent in 2014.

Manufacturing activity also requires a smaller share of jobs compared to decades past. Manufacturing jobs accounted for 21.6 percent of total U.S. jobs in 1970, compared to 7.0 percent in 2010. The share was unchanged at 7.0 percent nationally in 2014. In Iowa, manufacturing jobs now account for 11.0 percent of total employment, compared to 10.6 percent in 2010 and 17.1 percent in 1970.

## CONTRIBUTIONS TO LOCAL ECONOMIES

The manufacturing sector contributes to local economies in Iowa in a number of ways. Manufacturing firms pay wages to local workers, they purchase raw materials and services from local producers and firms, their profits accrue to local owners and investors, and they pay taxes to local and state governments.

- On average, manufacturing jobs account for 11.0 percent of total employment in Iowa. This fraction is lower in the state's metropolitan counties (8.6 percent) and higher in non-metropolitan counties (14.9 percent), according to data for 2014.
- Manufacturing accounts for 16.8 percent of total worker earnings in Iowa. The sector's earnings percentage exceeds its employment percentage because manufacturing jobs tend to pay higher wages than many other sectors.
- Manufacturing accounts for 13.0 percent of total earnings in Iowa's metropolitan areas and 23.3 percent of total earnings in non-metropolitan regions.
- Of Iowa's 99 counties, 24 counties derive more than one quarter of total worker earnings from manufacturing jobs.
- The top three counties by percentage of total earnings from manufacturing in 2014 were Iowa (48.1%), Marion (46.5%), and Muscatine (45.5%).
