Prevention through Design (PtD*)

COVID-19 Hierarchy of Controls

More Effective

Less Effective

Elimination
- Restrict visitors
- Staff work remotely
- Remove unnecessary items from work area
- Employee screening

Substitution
- Virtual meetings versus in-person
- Change to easier to clean materials.
- Move shipment transfers, break-areas outside

Engineering Controls
- Physical barriers between workstations
- No-touch exchange of tools and materials
- Zone facility and restrict staff to their zones
- Enhanced preventative cleaning schedule

Admin Controls
- Educate & promote proper personal hygiene at work
- Self-reporting of symptoms / self-quarantine
- Social distancing within facility

PPE
- Provide staff with proper PPE
- Cloth masks where staff distancing is difficult
